

# Rewoteric AM CAS

## Special features

- for inorganic and organic pigments
- excellent color strength (development)

## Recommended addition level

- architectural coatings
  - industrial coatings
- As supplied calculated on pigment: 5 - 15 %

## Processing instructions

Add to the grind before dispersion.

## Chemical description

3-(3-cocoamido-propyl)-dimethylammonium-2-hydroxypropan-sulfonate

## Technical information

- |                         |                        |
|-------------------------|------------------------|
| - appearance            | yellowish clear liquid |
| - active matter content | approx. 50 %           |
| - solvent               | water                  |
| - pH (10 %)             | approx. 7.5            |

## Suitability for food contact

Rewoteric AM CAS does not comply with any existing regulation that would allow the use in articles for food contact.

## Registration status
