

Data Sheet Issue 08/2013

# **CERAFLOUR 993**

Micronized amide wax for powder coatings to improve degassing (Benzoin-Synergist).

#### **Product Data**

#### Composition

Micronized amide wax

#### **Typical Properties**

The values indicated in this data sheet describe typical properties and do not constitute specification limits.

Melting point: 293 °F

Particle size distribution (laser diffraction, volume distribution): D50: 13  $\mu m$  D90: 31  $\mu m$ 

Supplied as: Micropowder

### **Food Contact Legal Status**

For the current food contact legal status, please contact our product safety department or visit www.byk.com for further information.

### **Storage and Transportation**

Temperature sensitive. To be stored and transported at a temperature below 50 °C (122 °F).

## **Applications**

#### **Powder Coatings**

#### **Special Features and Benefits**

The additive improves the degassing and pigment wetting of powder coatings as well as the electrostatic charge during processing. It also has a matting effect.

#### **Recommended Levels**

0.5-2 % additive (as supplied) based upon total formulation.

The above recommended levels can be used for orientation. Optimal levels are determined through a series of laboratory tests.

#### **Incorporation and Processing Instructions**

The additive is mixed with resin, hardener, pigments and other additives in a high-speed mixer and then extruded together with all components.

#### **CERAFLOUR 993**
