

## HDPE made via Spherilene Process

# Product data sheet 424F5

424F5 is a HDPE grade for blown raffia. This resin combines good processability with low gels and good tenacity.

**HDPE: 424F5**

**Density: 0.942**

**MFI: 0.5**

### Features

- good processability
- low gels
- good tenacity

### Applications

- Stretched application grade
- Raffia (textile grade)

### Additives

- THERMAL ANOTIOXIDANT
- PROCESSING AID

**Material properties** (This data are typical values and are not to be construed as product specifications.)

82

Resin properties	Unit	Typical values	ASTM Method
Melt Index	(g/10')	0.5	D 1238
Density	(g/ml)	0.9420	D 1505
