MITTEL 6772

Curing enhancer for polyurethane coatings

CHARACTERISTICS (INTERNAL METHODS)

- | | |
|------------------------|---------------|
| • Gardner Colour | max 1 |
| • Density, g/ml | 0.890 – 0.895 |
| • (*) Active substance | 10 % |

(*) not present on COA

APPLICATIONS

MITTEL 6772 is a curing enhancer for 2K-PU coatings that allows to reduce touch-free without significantly altering the pot-life of PU coatings (for example with URONAL P75 N.S or URONAL NL, NL 100).

MITTEL 6772 doesn't worsen the film's yellowing resistance.

Dosage: 0,05 - 2.0 % depending on drying-time requested.

However, due to the huge number of potential partners, preliminary tests are recommended.

SHELF LIFE AND STORAGE

MITTEL 6772 if stored in original sealed container in protected areas doesn't have a limited shelf-life..

For all information related to handling and toxicological knowledge, please refer to the Safety Data Sheet.
