MITTEL 6773

Stabilizer for unsaturated polyester

CHARACTERISTICS (INTERNAL METHODS)

- Gardner Colour max 1
- Density, g/ml 0.901 – 0.910
- (*) Active substance 3 %

(*) not present on COA

APPLICATIONS

MITTEL 6773 is a quinone based stabilizer, suitable to prolong the shelf-life of unsaturated polyesters or coatings based on unsaturated polyesters.

MITTEL 6773 should reduce drying-time of the coatings.

MITTEL 6773 can be added at any time by stirring.

Dosage : 0.1 – 1 % on final formula.

However, due to the huge number of potential partners, preliminary tests are recommended.

SHELF LIFE AND STORAGE

MITTEL 6773 if stored in original sealed container in protected areas, doesn't have a limited shelf-life.

For all information related to handling and toxicological knowledge, please refer to the Safety Data Sheet.
