

Product Name: PA175

GENERAL SPECIFICATION:

Product name: KTC lubricating processing aid PA175 is polymer grafted acrylic resin which enhances the metal release properties of PVC based Formulation. improve plate out properties and melt strength. PA175 with low molecular weight plays excellent role in processability and surface finish property

Typical Application: Blow molded containers. extruded profile. Calendered sheet and extruded film. PVC foam sheets

SPECIFIED DATA:

Chemical description	Acrylic grafted copolymer
Physical form	White powder
Bulk density	0.48 g/cm³
Volatile matter content	1%
Molecular Weight	Low
Particle Size	80 micron mean
